Rinse skin with water/shower (P303+P361+P353).

Seek medical attention if irritation persists

#### In case of eye contact:

Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing (P305+P351+P338).

Irrigate eyes thoroughly whilst lifting eyelids

Obtain immediate medical attention

#### If inhaled:

If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing (P304+P341).

When in doubt or symptoms persist, seek medical attention

**If swallowed:**

Rinse mouth.

Do NOT induce vomiting (P301+P330+P331).

Never give anything by mouth to an unconscious person

Give water or milk to drink

**4.2 Most important symptoms and effects, both acute and delayed**

Symptoms: Eye irritation, skin irritation

**4.3 Indication of any immediate medical attention and special treatment needed**

Treatment: Treat according to symptoms (decontamination, vital functions), no known specific antidote.

<b>5 FIRE FIGHTING MEASURES</b>
---------------------------------

**5.1 Extinguishing media:**

Not flammable. In case of fire use extinguishing media (Carbon dioxide. Dry powder. Water spray jet), appropriate to surrounding conditions. Fight larger fires with water spray jet or alcohol-resistant foam.

**5.2 Special hazards arising from the substance or mixture**

No special hazards known. However as smoke from fires is irritating. Take precautions to protect personnel from exposure.

**5.3 Advice for fire-fighters**

As in any fire, wear self-contained breathing apparatus and suitable protective clothing including gloves and eye/face protection.

**5.4 Additional information**

The degree of risk is governed by the burning substance and the fire conditions. Contaminated extinguishing water must be disposed of in accordance with official regulations.

<b>6 ACCIDENTAL RELEASE MEASURES</b>
--------------------------------------

**6.1 Personal precautions, protective equipment and emergency procedures**

Use personal protective clothing. Information regarding personal protective measures see, chapter 8.

<b>8 EXPOSURE CONTROLS AND PERSONAL PROTECTION</b>
--

### 8.1. Control parameters

Components with occupational exposure limits  
No occupational exposure limits known.

### 8.2. Exposure controls

The following information applies for the uses indicated in subsection 1.2. If available, please refer to the product information sheet for application and handling instructions. Normal use conditions are assumed for this section.

Recommended safety measures for handling the undiluted product: Covering activities such as filling and transfer of product to application equipment, flasks or buckets

*If the product is diluted by using specific dosing systems with no risk of splashes or direct skin contact, the personal protection equipment as described in this section is not required.*

Appropriate organisational controls: Avoid direct contact and/or splashes where possible. Train personnel.

#### Respiratory protection:

Respiratory protection in case of vapour/aerosol release. Particle filter with medium efficiency for solid and liquid particles (e.g. EN 143 or 149, Type P2 or FFP2)

#### Hand protection:

Chemical resistant protective gloves (EN 374)

Suitable materials also with prolonged, direct contact (Recommended: Protective index 6, corresponding > 480 minutes of permeation time according to EN 374): nitrile rubber (NBR) - 0.4 mm coating thickness.

Supplementary note: The specifications are based on tests, literature data and information of glove manufacturers or are derived from similar substances by analogy. Due to many conditions (e.g. temperature) it must be considered, that the practical usage of a chemical-protective glove in practice may be much shorter than the permeation time determined through testing.

Manufacturer's directions for use should be observed because of great diversity of types.

#### Eye protection:

Safety glasses or goggles (EN 166). The use of a full-face shield or other full-face protection is strongly recommended when handling open containers or if splashes may occur.

#### Body protection:

Body protection must be chosen depending on activity and possible exposure, e.g. apron, protecting boots, chemical-protection suit (according to EN 14605 in case of splashes or EN ISO 13982 in case of dust).

#### General safety and hygiene measures

Wearing of closed work clothing is recommended. Handle in accordance with good industrial hygiene and safety practice.

#### Respiratory protection:

No special requirements under normal use conditions.

#### *Recommended safety measures for handling the diluted product*

**Recommended maximum concentration (%):** 5

#### Appropriate engineering controls:

Use only in well ventilated areas.

#### Appropriate organisational controls:

No special requirements under normal use conditions.

#### Personal protective equipment

#### Eye / face protection:

Safety glasses are not normally required. However, their use is recommended in those cases where splashes may occur when handling the product.

**Hand protection:**

Rinse and dry hands after use. For prolonged contact protection for the skin may be necessary.

**Body protection:**

No special requirements under normal use conditions.

**Respiratory protection:**

No special requirements under normal use conditions.

**Environmental exposure controls:**

No special requirements under normal use conditions.
